

Paving & Driveway Cleaner

Application instructions and technical overview

Nexus Paving & Driveway Cleaner is an effective and high strength cleaning concentrate designed for the professional user. The chemical formulation is suitable for removing oil, grease, rubber marks, mould, mildew, algae and general dirt.

Suitable for use on paving, driveways, stonework, brick walls, masonry, gravestones, garden ornaments and steps. Its invisible repelling barrier provides **long lasting protection** preventing re-growth of mould, mildew and algae etc.

application

1. Dilute 1 part **Nexus Paving & Driveway Cleaner** concentrate with 10 parts water depending on the severity of soilage.
2. Apply to paving area and agitate stubborn stain with a brush or sponge, leave for around 15 minutes (depending on temperature and weather however, **the product should not be left to dry on the paving**).
3. Clean off using a pressure washer and plenty of cold water.

Or, add the **Nexus Paving & Driveway Cleaner** concentrate to the integrated detergent bottle on the power/jet washer and allow the system to mix accordingly.

IMPORTANT: Ensure the product is not allowed to dry on treated surfaces. Do not use around fish ponds or aquariums. Do not allow the cleaner to run off to enter any drains or watercourses. Wash hands and exposed skin after use.
